

Information Security Policy Statement

Purpose & Context

At Inq. Digital Nigeria Limited, we are committed to protecting the confidentiality, integrity, and availability of all information entrusted to us. As a provider of innovative technology solutions in Edge AI and IoT, Fabric, SDN/NFV for Edge Cloud, Secure Access Service Edge, and Elastic Edge, safeguarding information assets is essential to the reliability and trustworthiness of our services.

Our Policy Statement

Inq. Digital Nigeria Limited has established an Information Security Management System (ISMS) aligned with ISO/IEC 27001:2022. We are committed to protecting the confidentiality, integrity, and availability (CIA) of all information assets processed, stored, or transmitted within the organization.

Top management commits to:

- **Appropriateness to Purpose and Context**
 - Ensuring the ISMS is appropriate to the organization's purpose, strategic direction, and operational environment, supporting secure and innovative service delivery.
- **Objectives & Framework for Setting Objectives**
 - Providing a framework for defining, implementing, and reviewing information security objectives in alignment with clause 6.2 of ISO/IEC 27001:2022 which include:
 - Protecting information assets against unauthorized access, disclosure, modification, damage, or loss.
 - Ensuring timely availability of services for customers.
 - Strengthening cyber resilience across systems, networks, and business processes.
 - Ensuring compliance with legal, regulatory, contractual, and industry requirements.
- **Commitment to Satisfy Applicable Requirements**
 - Complying with all applicable legal, regulatory, statutory, and contractual requirements related to information security, including obligations to customers, partners, and regulatory agencies.
- **Continual Improvement**
 - Continually improving the effectiveness of the ISMS through:
 - Regular risk assessments and treatments.
 - Audits, reviews, monitoring, and measurement of ISMS performance.
 - Lessons learned, incident reviews, and stakeholder feedback.

In accordance with ISO/IEC 27001:2022, Inq. Nigeria ISMS policy shall:

- a) Be available as documented information
- b) Be communicated within the organization
- c) Be available to interested parties as appropriate

All employees, contractors, and third-party partners are responsible for adhering to this policy and supporting the overall security objectives of Inq. Digital Nigeria Limited.

Management at all levels shall:

- Promote a culture of information security.
- Ensure relevant resources are provided for ISMS implementation and improvement.
- Ensure security responsibilities are clearly assigned and understood
